Women to be 55 per cent of workforce

KUALA LUMPUR: The Women, Family and Community Development Ministry is committed to increasing female participation in the workforce to 55 per cent by year-end.

Deputy Minister Datuk Azizah

Mohd Dun said the ministry was confident of achieving the target.

"We have already reached 53 per cent. Various initiatives have been introduced, including flexible working hours for women, working from

home and returning home early.

"The ministry also encourages the government and private sector to provide childcare centres, which act as a support system for working parents," **Bernama**
